## Convergence (FMC) Subscribers Need Access to GSM Roaming

- Convergence MVNOs enable consumers to improve coverage and reduce their total telecom expense by taking advantage of their internet service
  - Leverages and strengthens campus, community and other public-private broadband networks and initiatives
  - As broadband access grows consumers will require FMC
  - Broadband provider (convergence MVNO) provides home or “fixed” service
  - PCM provides FMC technology and controls and directs all calls- first to WiFi or PCM’s GSM network, then to roaming GSM networks
  - Convergence MVNO subscriber roams on AT&T only when no other GSM network available – carrier of last resort
